

IMM eReceiptsCloud

Release Notes

eReceipts 8.0.3.2

New With This Release

Note: For the latest features and fixes, the latest versions are required.

- eReceipts Server 8.0.3.2
- eReceipts Client 8.0.3.2
- Archive Agent

Supported Client Upgrades

- eReceipts Client 8.0.3.2 can be upgraded from eReceipts 8.0.3.1 and 8.0.2.5.

eReceipts Client Compatibility

- eReceipts Client 8.0.3.2 (New)
- eReceipts Client 8.0.3.1
- eReceipts Client 8.0.2.5

Features

Prevent Duplicate Transactions

- A fraction of a second is supported in the GetCurrentDateTime function to prevent duplicate transactions. When transactions are archived, the ability to use time intervals less than a second allows the generated file name (based on index fields and custom functions) to be unique. As a result, transactions are not flagged as duplicates. The minimum value is hundredths of a second (ff) and the maximum value is ten millionths of a second (ffffff). For existing environments, Archive Agent must be updated and the GetCurrentDateTime function must be manually updated. Refer to the Agent Install Guide for details about updating the Archive Agent. (ERW-2238)

Upload Client Logs

- Get troubleshooting assistance faster and with less interruption to your day-to-day schedule by uploading the eReceipts client logs to a secure cloud location as soon as an issue occurs. IMM Support can then easily access the client logs and begin the troubleshooting process. To use this feature, select the Upload Client Logs menu option from the eReceipts Client system tray icon. (ERW-2794)

Scanner Setting Name Improvements

- For improved clarity, the setting to set single side or double side scanning is renamed to Scan Mode. (ERW-1547)

Performance Updates

- eReceipts is updated with performance enhancements. (ERW-2811)

IMM eReceiptsCloud

Release Notes

XP Platform

- Reports are supported. Reports are internal transactions created by a financial institution for reference and auditing. Reports can be printed and archived in the imaging system. As of this release, printed reports are supported in landscape orientation using font size 8 or 9. (ERW-2296)
- eReceipts automatically consolidates two or more blank lines on a receipt to minimize wasted space. (ERW-2057)
- To improve the readability of receipts, a dash (-) separates Hold Header and Hold Description information. (ERW-2063)
- Alignment of data is improved. (ERW-2077)

Fixes

Teller Portal

- If a transaction is printed, the Print Transaction entry is displayed twice in the Transaction Log. (ERW-2557)
- When the font style for printed receipts is set to bold, portrait receipts are printed in regular font style. (ERW-1846)
- 1x5 signature pads will not connect to the COM connection port. (ERW-2831)
- Member names with an ampersand (&) and less than symbol (<) result in a Resolve Transaction error. (ERW-1735)

Spectrum Platform

- When a member has two accounts and performs transactions on both accounts, the first account is masked on the receipt but the second account is not masked. (ERW-2821)

XP Platform

- Hold Notice reasons are not printed if a sub-reason is not selected. (ERW-2064)
- Member numbers are displayed in the Hold Notice area of a printed receipt and emailed receipt. (ERW-999)
- "IMM eReceipts" is displayed in the archived receipt. (ERW-1637)
- Letters in alphanumeric member numbers are not masked for receipts in portrait orientation. (ERW-1728)
