

IMM eReceiptsCloud

Release Notes

eReceipts 8.0.3.9

New With This Release

The components listed here are new or updated in this release. For the latest features and fixes, the latest versions are required.

- eReceipts Server 8.0.3.9
- Archive Agent
- Member Import Agent

eReceipts Client Compatibility

eReceipts Server 8.0.3.9 is compatible with these client versions:

- eReceipts Client 8.0.3.8
- eReceipts Client 8.0.3.5
- eReceipts Client 8.0.3.4

Features

View Individual Transaction Totals

- For each individual transaction, view the total received and total disbursed cash amounts when accessing the report from the View Report option on the Teller Reports page and from the downloaded copy. This enhancement makes identifying and resolving report and drawer discrepancies easier when the total cash reported for a transaction does not match the actual cash received and disbursed. This feature may not be available for transactions created prior to eReceipts 8.0.3.9. (ER-594)

DNA UX Support

- The DNA UX platform is supported to allow the use of .txt data files. Simultaneously run standard DNA and DNA UX platforms to support both .txt and .dat file formats. (ER-364)

Upgrade Improvements for Agents

- Using the latest MSI files, the upgrade experience for the Archive and Member Import Agents is simplified. Manual procedures to upgrade are no longer required. Refer to the eReceipts 8 Agent Guide for details. (ER-540, ER-600)

Fixes

XP Platform

- Visa Cash Advance transactions and Cashier Check Receipt transactions were missing some information from the data files. (ER-652)
