Generic Fields Mapping Exercise

Scenario 1: Field Data should NOT carry over from one document to another.

Map the following fields using an abbreviated version of the document name followed by sequential numbers.

Example:
First Generic Field Name: GEN_FLD_MAPPING_EX_1
Additional Generic Field Names: GEN_FLD_MAPPING_EX_2, GEN_FLD_MAPPING_EX_3, etc.

Primary Borrower	Spouse/ Co-Borrower
SSN:	SSN:
Name:	Name:
Address:	Address:
City, State, Zip:	City, State, Zip:

Scenario 2: Field Data should carry over from one document to another.

The data in the section below should carry over from one document to the next when it is processed in eSign.
Map the fields using your own custom field names.

Example:
Loan Amount Field Name: CSTM_LN_AMT
Loan Description Field Name: CSTM_LN_DESC

Loan Amount:					
Loan Description:					
Loan Term:		Loan Rate:			
Payment Amount:		Payment Frequency:		Payment Due:
